

Summer Student Immersion Program

A unique 4-week immersive experience designed to provide you exposure to real-world companion animal medicine.

What can you expect?

The program is designed to help you learn and grow prior to your clinical year, and ultimately assist you on your journey of becoming a practicing veterinarian. You'll be paired with a mentor who will help guide you through the program, shadowing a variety of roles and doctors within one of our AZPetVet hospitals here in the Phoenix, Arizona area. You will learn more about typical caseloads, technical skills, surgery, medical cases, client communication, daily operation of a general practice, and more! The program also has a self-driven component to it... meaning that we want you to take an active role in determining what you want to learn!

The program is open to veterinary students during their summer break between 1st and 2nd year, or 2nd and 3rd year. The program is approximately 40 hours per week for 4 weeks. We will work with you up front to determine days and times that accommodate your student schedule. There is no cost for students; **in fact, it is a paid opportunity!**

"Not only did it increase my confidence about being a veterinarian but it also was a great opportunity to learn things that aren't easily taught in a classroom."

Summer 2023! We have a limited number of program spots, so reach out soon for the widest selection of available locations!

Simply reach out to Dr. Kelli Evans to learn more about program details and schedule options via phone or email at: (928) 308-8361 or Kelli.Evans@AZPetVet.com
